Probability

The marbles pictured below are green, black, and red. They are placed in a bag and one is drawn at random.

1. Which color marble is least likely to be drawn from the bag? _____
2. What is the probability of drawing the red marble from the bag? _____
3. What is the probability of drawing a green marble? _____
4. What is the probability of the drawing a black marble? _____
5. What is the probability of drawing a marble that is not red? _____
6. Would you be more likely to draw a marble that is not black or a marble that is not green? Explain your answer.

7. If three more green marbles were added to the bag, what would be the probability of drawing a green marble? _____

Name _____

Score: _____

Probability (A) **Answers**

The marbles pictured below are green, black, and red. They are placed in a bag and one is drawn at random.

1. Which color marble is least likely to be drawn from the bag? **Black**
2. What is the probability of drawing the red marble from the bag? **3 out of 7**
3. What is the probability of drawing a green marble? **3 out of 7**
4. What is the probability of the drawing a black marble? **1 out of 7**
5. What is the probability of drawing a marble that is not red? **4 out of 7**
6. Would you be more likely to draw a marble that is not black or a marble that is not green? Explain your answer.

You'd be more likely to draw a marble that is not black. There is only one black marble and 6 that are not black. You have a 6 out of 7 chance of drawing a non-Red marble. You have a 4 out of 7 chance of drawing a marble that is not green.

7. If three more green marbles were added to the bag, what would be the probability of drawing a green marble? **6 out of 10**
